

The Enterprise Security and Network Consulting Company

that specializes in security and network management, UNIX technologies, and the integration of Open Source solutions. Our mission is to provide affordable, secure, and scalable solutions for our customers. Using best-of-breed technologies, we deliver high quality at low cost.

Security Consulting

osRiver uses proven methodologies to achieve your company's security goals. From policy development to management and support, we provide solutions for all phases of the security lifecycle. Our certified consultants strengthen your strategy and compliance (SOx, PCI).

Network Consulting

osRiver offers design, implementation, management, and support solutions for networks of all sizes. Our engineers have extensive experience with Secure Computing, Juniper, Cisco, and Nortel.

UNIX Consulting

osRiver provides a broad range of UNIX consulting services including system design, administration, configuration, tuning, and support services.

Open Source Consulting

osRiver delivers implementation, integration, troubleshooting, and support services for many Open Source packages. For a full list of supported packages, go to osriver.com/solutions.
